

## H1N1 Flu (Swine Flu)

What is 2009 H1N1 (swine flu)?

2009 H1N1 (sometimes called “swine flu”) is a new influenza virus causing illness in people. This new virus was first detected in people in the United States in April 2009. This virus is spreading from person-to-person worldwide, probably in much the same way that regular seasonal influenza viruses spread. Visit the [Centers for Disease Control and Prevention](#) website and the [US Department of Health & Human Services](#) website for more information.

Click on the following flyers for use in your ministries:

[H1N1 - General](#)

[H1N1 - Teens](#)

Additional flyers are available for Friends of the Center. If you are not a Friend of the Center, [click here](#) to learn more.
